- Dodd III, Tom. 1999. "Breeding and Propagating Native Azaleas." 21(3): 46.
- Aromi, Dr. Eugene. 1999. "Aromi Hybrids." 21(3): 47.
- Schild, J.E. 2000. "Azaleas of Reflection Riding Arboretum and Botanical Garden." 22(1): 13-14, 20.

[Back copies may be ordered from Col. Murray Sheffield, 334-567-4974. See price list on Table of Contents page, this issue. You can view an extensive discussion on the [azaleas@azaleas.org](mailto:azaleas@azaleas.org) email discussion forum about care and culture of deciduous azaleas by consulting the archives feature. As a refresher on how to do this, please see *Going to the Archives* sidebar, Ed.]

### Going to the Archives

To see the archives, use your browser to go to <http://www.azaleas.org> and choose Archives from the sidebar menu or click it at the bottom of the page. This goes to the archives page, which has links for each month as well as a search facility.

To see the e-mails by date and thread (topic), click the link for the month of interest. That shows a page of e-mail subjects, authors and dates, ordered by date and subject. If an e-mail is a reply to another e-mail with the same subject, it is shown under the original regardless of date. This makes it easier to follow a "thread" of e-mails on the same subject. Sometimes, however, an author will change the subject line slightly; you'll have to look around to be sure you've seen all the e-mail on the same or almost the same subject.

**Navigating within Archives:** Clicking an e-mail in this list shows its complete text and any attachments. Clicking your browser's Back button then returns to the index list.

**Search Tips:** If you know a word or phrase that is apt to be in the e-mails you are interested in, you can do a search for that word or phrase. Type it into the search box and click Search. That shows a list of all the e-mails containing your search text, ordered by the number of matches for each. This search feature has a long Help page which explains different ways to find just those e-mails you are interested in—no more and no less.

You may also review the archives via e-mail. To get started, send an empty e-mail to [azaleas-index.1\\_500@azaleas.org](mailto:azaleas-index.1_500@azaleas.org) to get a list of the first 500 e-mail subjects, authors and dates in the archive. When you see one that looks interesting, note its number, such as 287. To get it, send an empty e-mail to [azaleas-get.287@azaleas.org](mailto:azaleas-get.287@azaleas.org). Or, to get all the messages with that same subject, send an empty e-mail to [azaleas-thread.287@azaleas.org](mailto:azaleas-thread.287@azaleas.org). If you know you want to look at the entire thread, or keep it for future reference, that's much faster than visiting the archives, since the archives only show one e-mail at a time.

For example, there is a current thread on growing deciduous azaleas under the subject Growing Deciduous Azaleas.
